September 8, 2007

Dear Judy,

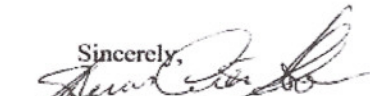

Thank you for speaking with me the other day. It was very emotional for me and brought back so many memories. I promise I will not write you again, for I feel you are like me and would just like to put this behind us.

Judy, there is a way to help. If you just tell them the truth that the DA and the State forced you into the Statement. Then when they would not let you out until they saw if my father was going to get a new trial, then they forced you to testify to let you out. It is the truth and they are to blame. They will be held accountable by the FBI for obstruction of justice. I understand not wanting to drag your kids through anymore, as we have been through so much as well. I am going to have to watch my father being executed. If you just tell them, the FBI, (I'll get you the name and number) not the State, or someone we can trust that the State forced you to sign that statement, then would not let you out and made you wait and forced you to testify at my fathers trial before they would release you. It is the truth and they cannot do double jeopardy on you and I will guarantee you immunity in writing from the FBI. I'll get it before you sign anything.

Judy, my father will be awarded millions for serving time on death row for a crime he did not commit. If you will just tell the truth and I get you immunity, I will promise you 20% so you and your family will never suffer again. It is the truth, they did force you and lie to you. Please think about it.

I promise I will not write you anymore, but it is my last hope, that you will please help save my father's life.

It was good to see you, and I was very emotional and I understand wanting a normal life. It is all I want to. Thanks again for being so kind and allowing me to speak with you.

Sincerely,  
  
Sherrie Arthur Stone

P.S Thanks again for seeing me. It  
gave me a little closure.
